This list contains 321 chemical entities within 30 therapeutic groups. The therapeutic groups are further divided into sub-therapeutic groups followed by the medicines' chemical entities (generic names). For each chemical entity, the corresponding dosage form and the level of care are stated on the same row. When prescribing the medicines, the prescribers should ensure that the indications are registered with the Drug Control Authority of Malaysia. For prescribers within Ministry of Health (MOH) facilities, the registered indications must also be listed in the MOH Medicines Formulary.
